PROFESSIONAL SUMMARY

Computer Science and Engineering (AI & ML) graduate with hands-on experience in backend development, PostgreSQL, Grafana, Node.js, Python, and data-driven monitoring solutions. Currently working at Genus on Watchman and Grafana dashboards, with a foundation in machine learning and data structures.

TECHNICAL SKILLS

Languages: Python, C, JavaScript, HTML, CSS | **Databases:** PostgreSQL, MySQL, SQLite

Technologies & Tools: Node.js, Angular, Django, RAG, ML, DSA, AWS, Docker, Redis, Grafana, Git/GitLab, Render

WORK EXPERIENCE

Graduate Engineering Trainee — **April 2026 – Present**
Genus Power Infrastructures Ltd. | Jaipur

- Develop and enhance the Watchman monitoring dashboard using React, Node.js, JavaScript, PostgreSQL, SQL, and HTML/CSS, integrating HES/MDM data with monitoring, reporting, filtering, and data-refresh functionality.
- Build and maintain Grafana dashboards and panels, converting reports into interactive SQL-based visualizations for Non-Communication, Wrong Connection, Low Consumption, RSSI, and Reserve Connection.
- Analyze and optimize PostgreSQL queries and database mappings; investigate missing or incorrect data using GitLab, pgAdmin, PostgreSQL, Grafana, Node.js, and VS Code/Cursor.

Automation Intern — **June 2024 – September 2024**
Itron India Pvt. Ltd. | Bangalore

- Developed a Python automation tool to manage NLC board configurations through serial communication, supporting JSON-based read/write operations.
- Implemented error handling and logging to improve reliability and support future GUI, scalability, and cloud remote-management enhancements.

Ethical Hacking Intern — **May 2023 – August 2023**
Infexial Software Solutions

- Conducted vulnerability analysis and penetration testing on a blood bank application to identify security flaws and implemented secure communication protocols to protect donor/recipient data.

PROJECTS

AI-Powered Resume Screening

- Built a web application that parses resumes and uses AI to evaluate skills, communication, and experience, generating structured candidate assessments.
- Developed Angular frontend and Node.js backend workflows for resume processing, evaluation, interview scheduling, automated email communication, and online interview access.

Virtual Drawing System

- Developed a computer-based platform for creating and manipulating digital art using a virtual canvas and drawing tools; Used ML techniques like CNN and OpenCV for image processing.

WebScraping-News RAG Knowledge Base

- Built a Python web-scraping and RAG pipeline that crawls news outlets (TOI, ET, Hindustan Times, ChemAnalyst), validates articles, stores them in SQLite, and indexes content with embeddings for AI Q&A.

EDUCATION

B.Tech, Computer Science & Engineering (AI & ML) — **2021 – 2025**
Manipal University Jaipur | CGPA: 7.45/10

Class XII (CBSE) — Ryan International School, Noida | 92.4% — **2020 – 2021**

Class X (CBSE) — Ryan International School, Noida | 89.8% — **2018 – 2019**

CERTIFICATIONS & ACTIVITIES

Microsoft Generative AI (Jan 2025) | AWS Cloud Practitioner (Jan 2025) | Ethical Hacking, Infexial (Aug 2023)
Algorithms Design Techniques, Udemy (Nov 2023) | Artificial Intelligence, 1stop (Aug 2022)
Participated in Dell and Digibox Hackathons
